

Mixing Vessel Liners

NITTEL Mixing Vessel Liners are the ideal solution for lining your vessel.

NITTEL Mixing Vessel Liners are manufactured by welding a circular disc to one end of an open ended tube of material. The weld then forms a liquid tight seal. This technology provides a high level of tear resistance. The accurate fit of the liner reduces the formation of creases and air pockets, which is often a problem with ordinary flat bags. Special discharge outlets can be fitted to the liner where appropriate.

Use:

Mixing Vessel: From 200 to 1500 litres; diameters of 500mm to 1400mm

Versions:

Open at the top.

Application Examples:

NITTEL Mixing Vessel Liners: Ideal for in house use. Removes the requirement to clean the mixing vessel.

- Allows maximum product recovery.
- Simple to fit to maintain productivity levels.
- Protects valuable product from contamination.
- Many different heights and diameters available.
- EU & FDA Food Approved material available.
