

Barrier Foil Liners

NITTEL Barrier Foil Liners are the ideal solution for lining your drum or pail if your product requires extra barrier protection.

NITTEL Barrier Foil Round Bottom Liners are manufactured by welding a circular disc to one end of an open ended tube of material. The weld then forms a liquid tight seal. This technology provides a high level of tear resistance. The accurate fit of the liner reduces the formation of creases and air pockets, which is often a problem with ordinary flat bags.

Use:

Pails: 5 to 40 litres

Plastic drums: From 30 to 225 litres

Steel drums: From 60 to 225 litres

Versions:

Open at the top

Material:

Coextrusion films (antistatic and conductive)

Aluminium foils

Application Examples:

NITTEL coextrusion film Round Bottom Liners - Ideal for hot fillings of up to 120°C and for products with solvent content, e.g. lacquers.

NITTEL aluminium foil Round Bottom Liners - Ideal for (reactive) hot-melt adhesives.

- Can be used in all types of containers.
- Different heights and diameters available.
- Protects valuable product from contamination.
- Can be used in new, standard, and reconditioned containers.
- Makes single trip containers genuinely multi trip.
- EU and FDA food approved materials available.
